

Emoji Drug Code DECODED

**ONE
PILL CAN
KILL**

Do you know the meaning behind certain emojis? Emojis were originally designed to represent an emotion, event, or activity, but have recently taken on a language of their own. Criminal organizations, including drug traffickers, have noticed and are using emojis to buy and sell counterfeit pills and other illicit drugs on social media and through e-commerce. This reference guide is intended to give parents, caregivers and influencers a better sense of how this language is being used in conjunction with illegal drugs. It is important to note, this list is not all-inclusive and the images contained below are a representative sample. Emojis, on their own, should not be indicative of illegal activity, but coupled with a change in behavior; change in appearance; or significant loss/increase in income should be a reason to start an important conversation. We understand initiating those conversations can be difficult so we have resources available at [DEA.gov/onepillcankill](https://dea.gov/onepillcankill).

Oxycodone

Xanax®

Percocet®

Adderall®
